

10.9.79  
REGULATION 31: DESIGN OR WORK-PRACTICE CONTROL STANDARDS

Rule 312: Asphalt Kettles

A. Emissions from the operation of an asphalt kettle must be minimized by the following controls:

1. Maintaining the temperature below the asphalt flash point and below the maximum recommended by the asphalt manufacturer.
2. Operating the kettle with lid closed except when charging.
3. Pumping the asphalt from the kettle or the drawing of asphalt through cocks with no dipping.
4. Maintaining the kettle in clean, properly adjusted, and good operating condition, and
5. Firing the kettle with liquid petroleum gas or other low polluting fuel.
